

What is the total revenue in the biotechnology sub industry for the year 2013,2014,2015?

	Year 2015	Year 2014	Year 2013
Mean	\$11,722,980,571	\$9,708,667,429	\$6,881,738,000
Median	\$9,256,000,000	\$7,670,400,000	\$6,493,900,000
Standard deviation	\$11,538,115,778	\$9,385,228,754	\$6,341,676,935
growth %	21%	41%	
Range(max-min)	\$33,888,698,000.00		

The above chart shows us that the total revenue has increased over the years . In 2013 the total revenue is \$48,172,166,000.00 and by 2015 the revenue increased to \$82,060,864,000.00 .In 2015 the total revenue made a growth of 20.75% from the past year . Looking at the table we can know that year 2014, and 2015 is a right skewed data because the median is lesser than the mean . In 2013 the mean and median is almost the same .The standard deviation of the total revenue for year 2015 is higher than year 2013 ,so the year 2015 has more significant variability in the revenue .Hence the range is more spread out.
